

FCC, please reject the NAB petition 04-160. I pay for satellite radio and I don't understand why my service should be limited by a competing entity that I don't directly pay for. AM/FM radio stations have audiences to appeal to, but they do not require a subscription fee. I pay for satellite radio, because it offers much more than AM/FM Broadcasters. I think this petition is designed to give the NAB an unfair advantage in the industry. Further more, I believe that this will inhibit the growth of future technologies and services for the industry.
